

Important!

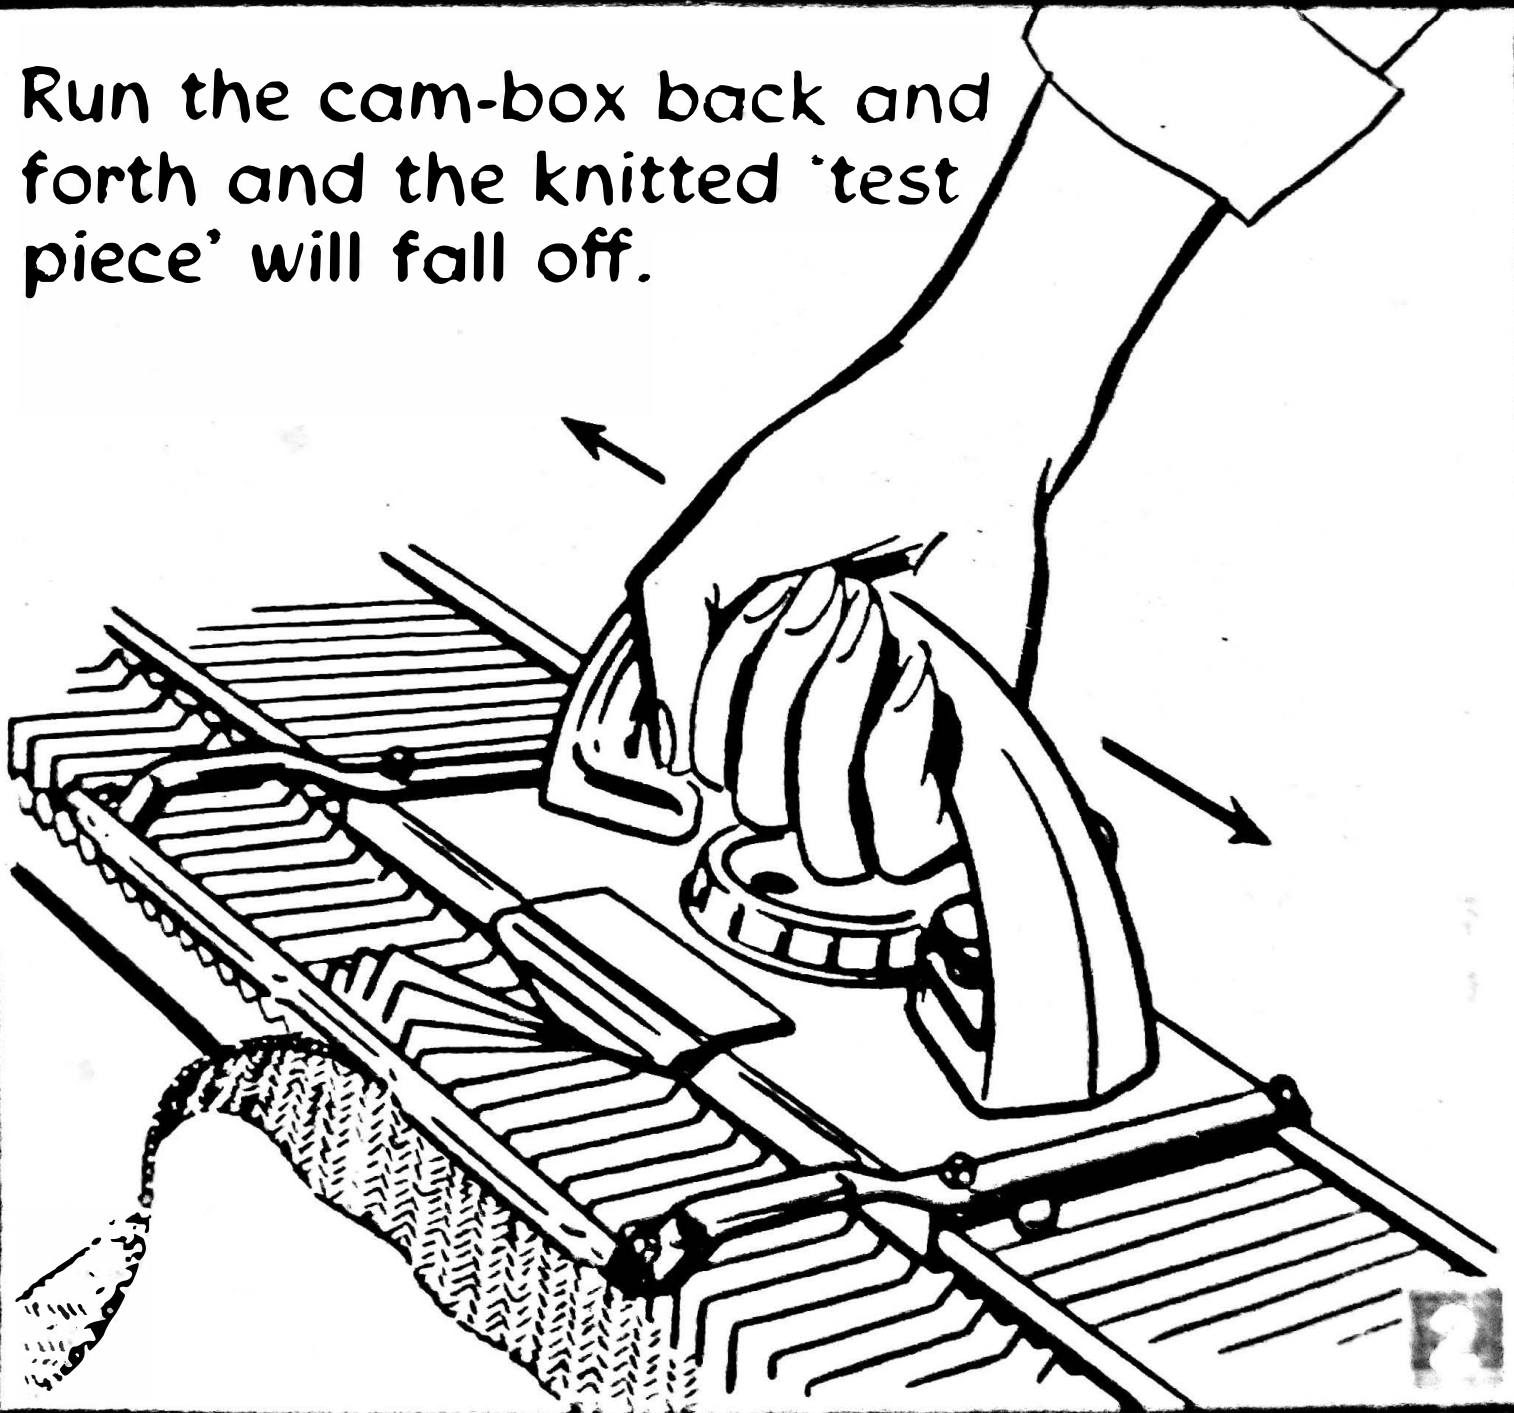

**FOLLOW THESE
INSTRUCTIONS
FIRST...**

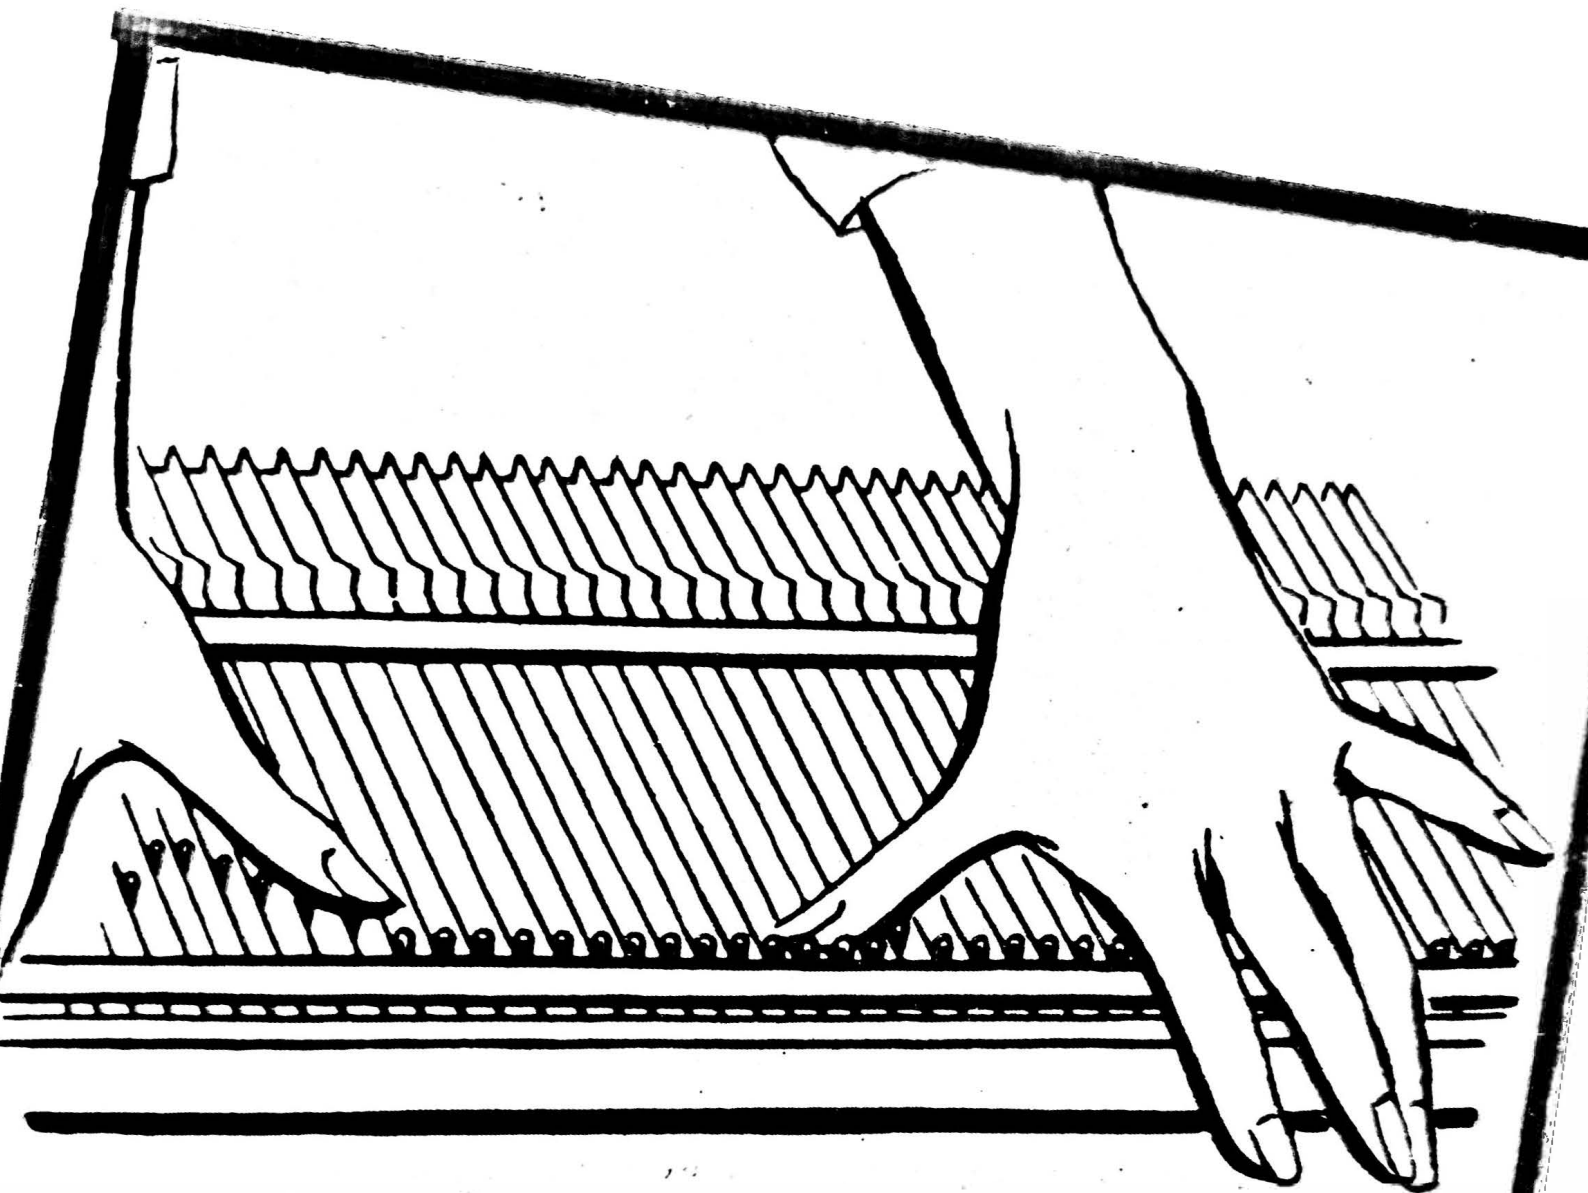

TAKE THE MACHINE OUT OF
THE CASE AND PLACE IT ON
THE EDGE OF A TABLE

Press both cam-knobs down
until they 'click'

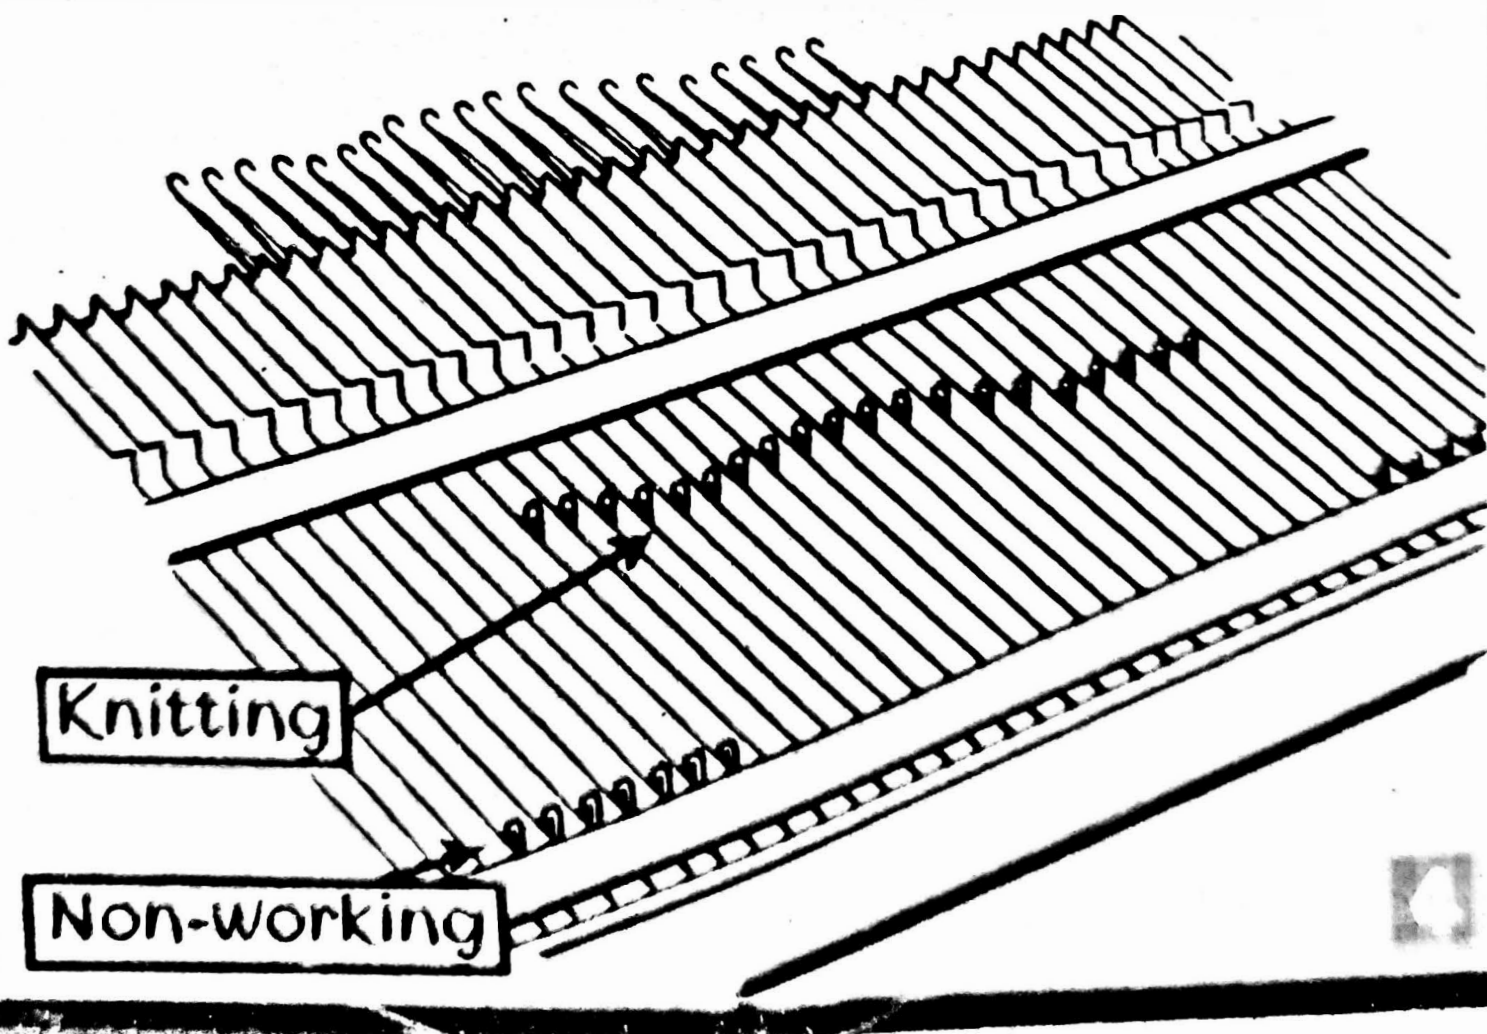

Run the cam-box back and forth and the knitted 'test piece' will fall off.

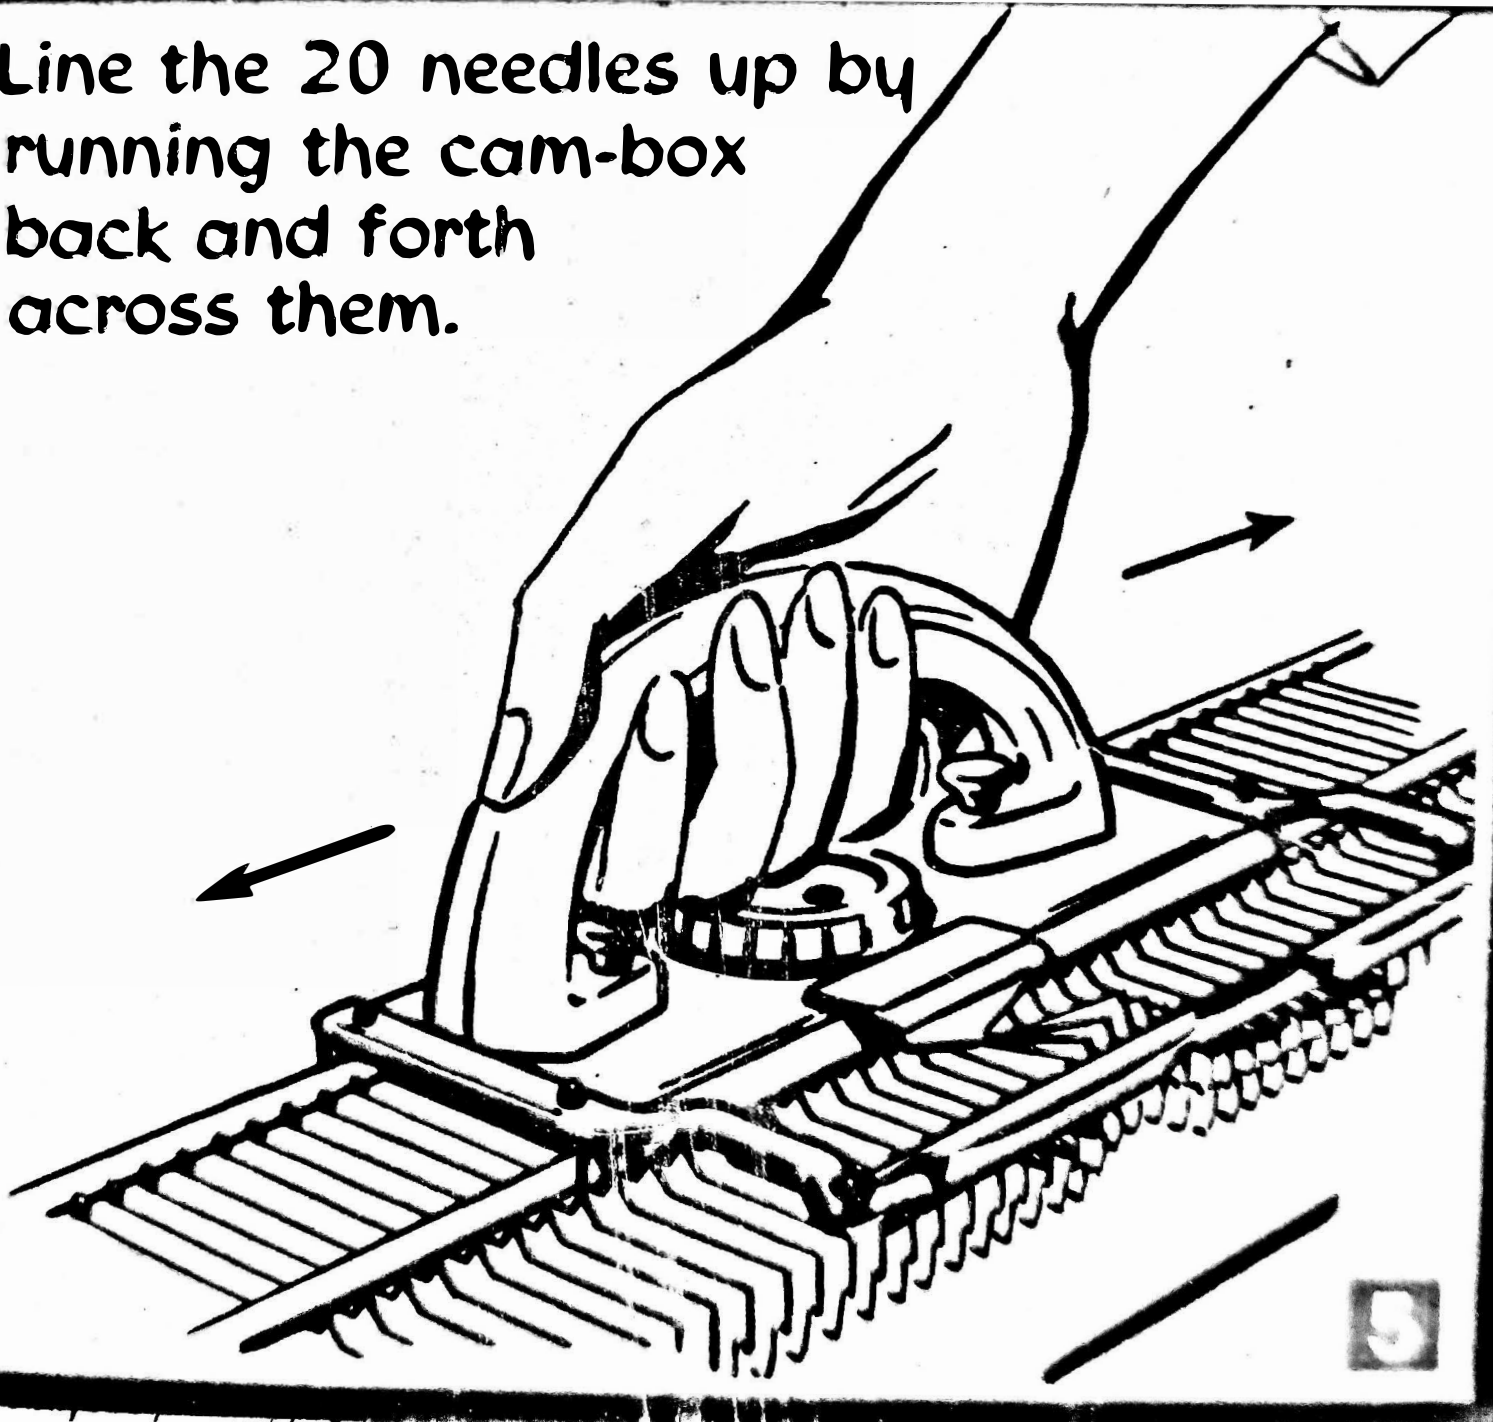

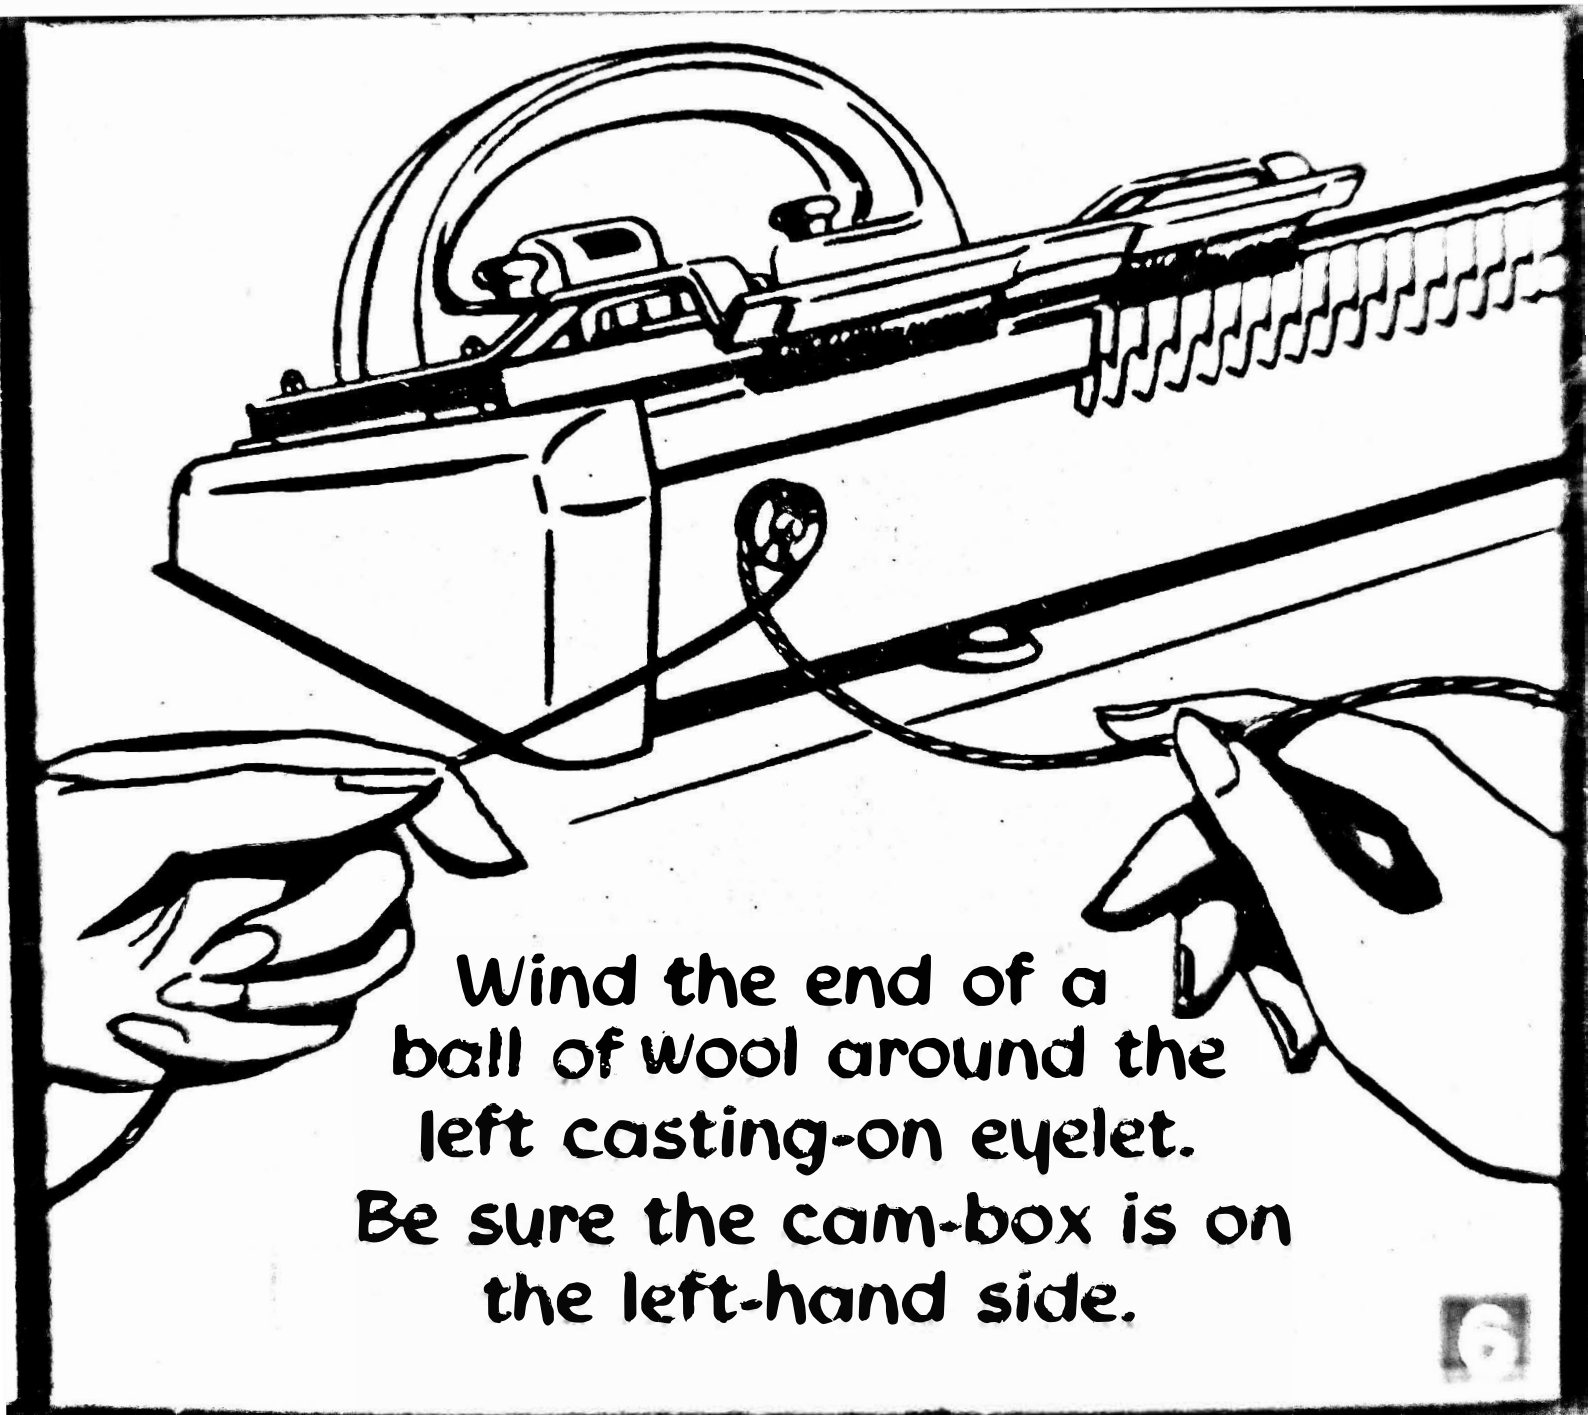

Push all needles back into
the non-working position.

Push 20 needles (10 on either side of Zero) half-way forward into the knitting position.

Line the 20 needles up by
running the cam-box
back and forth
across them.

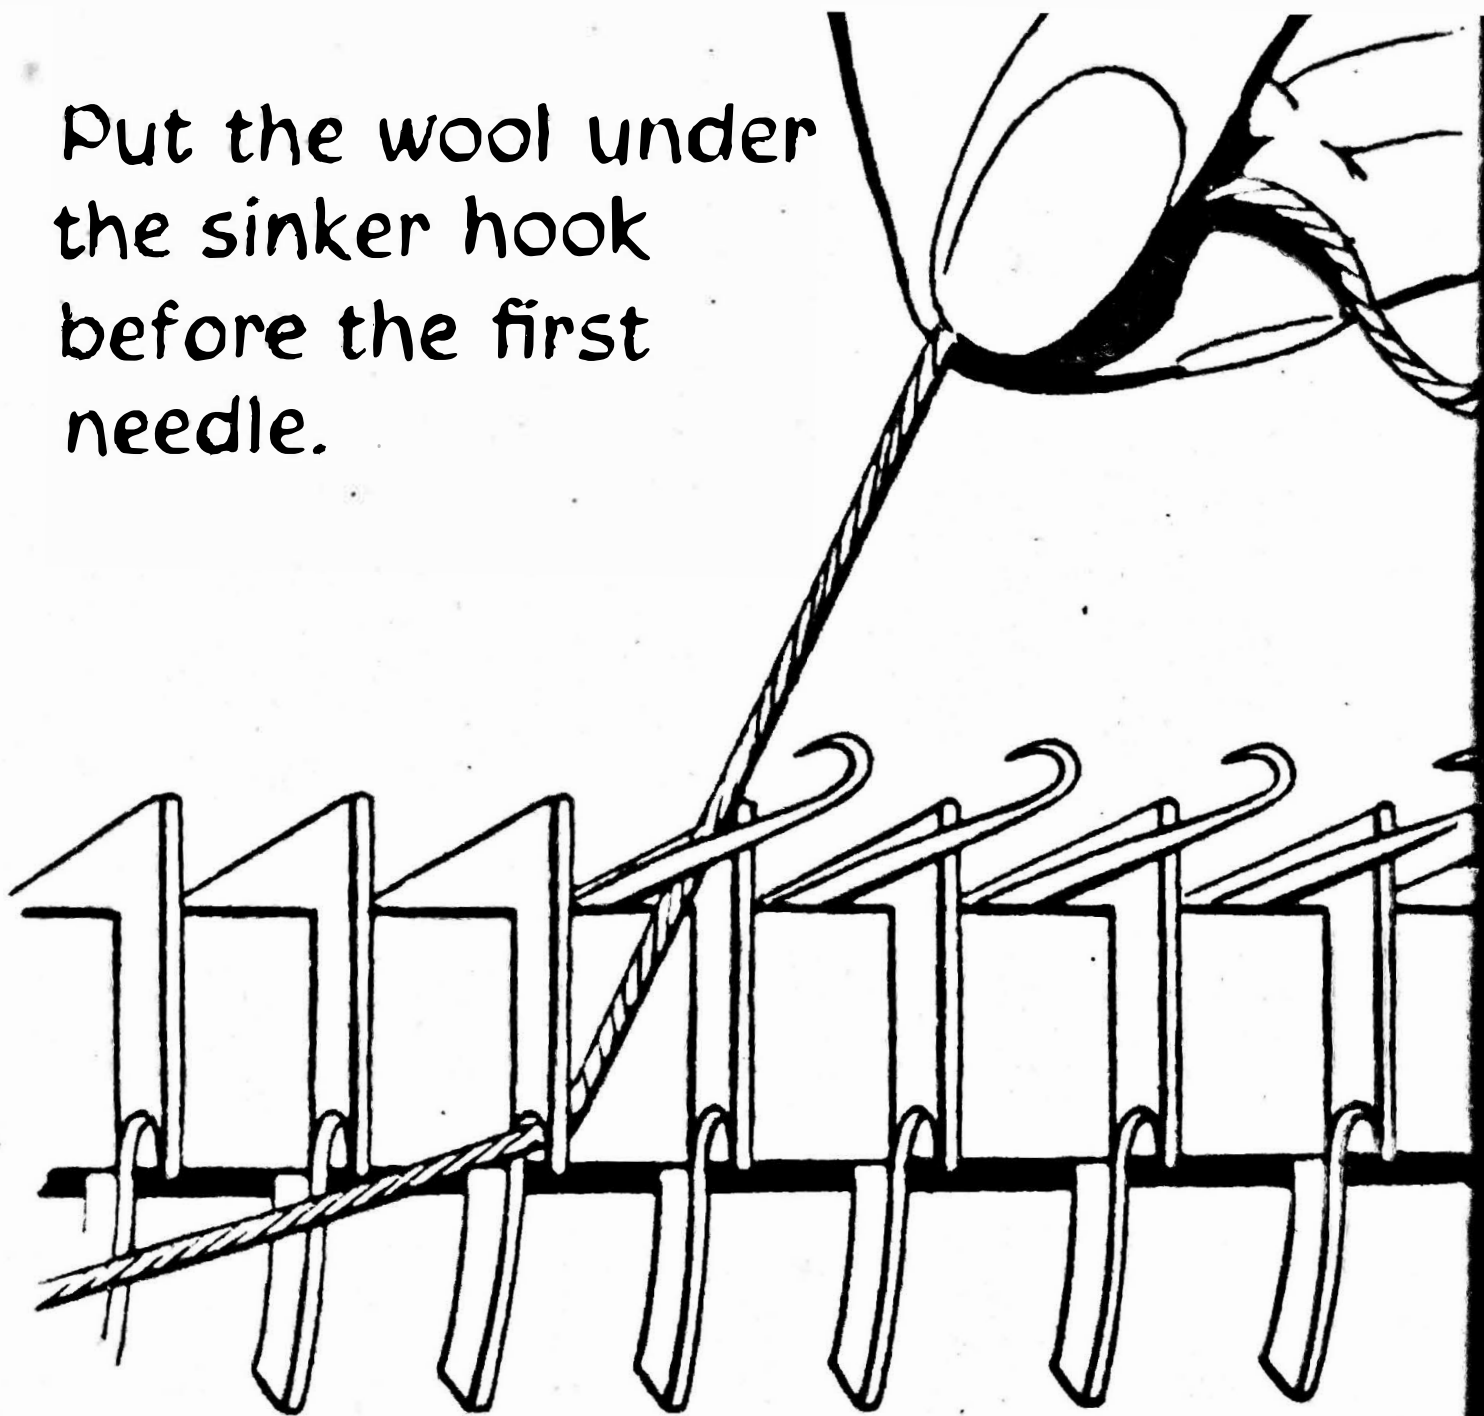

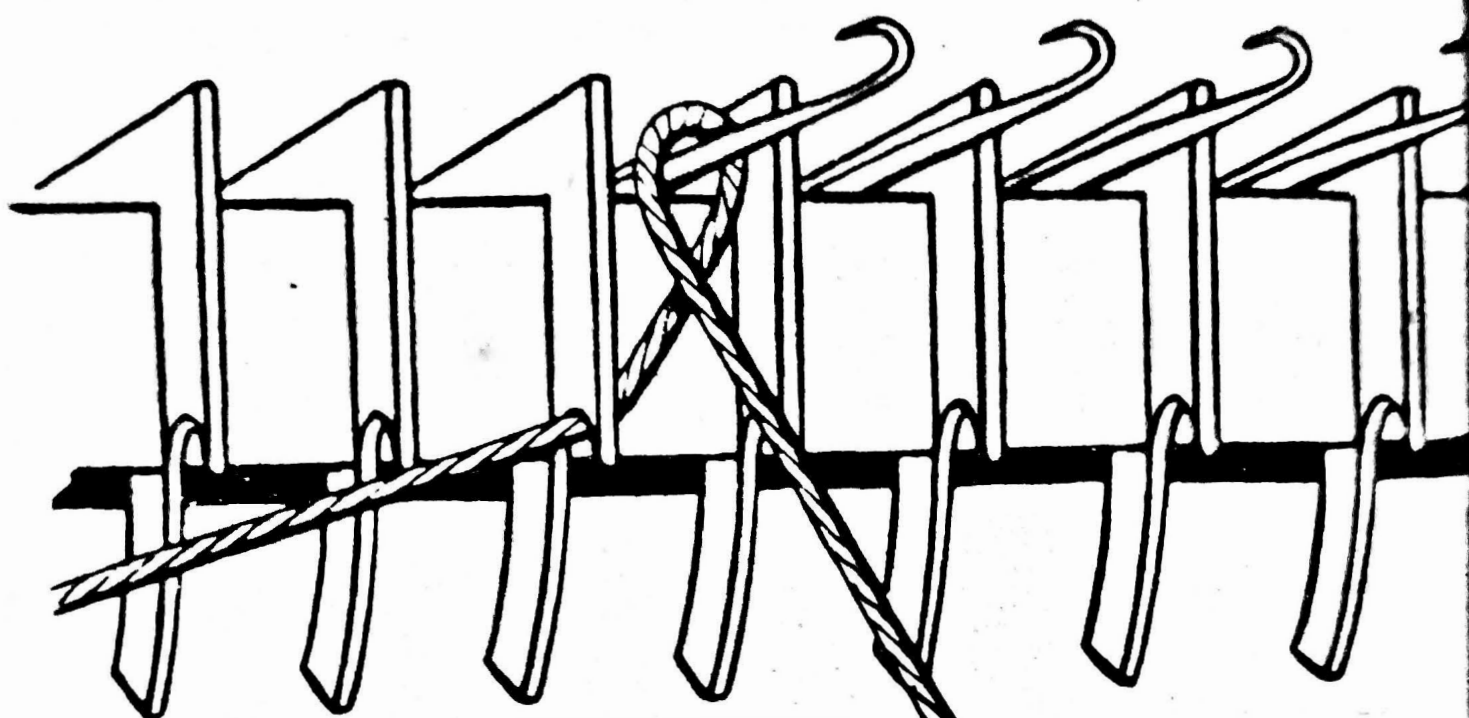

Wind the end of a ball of wool around the left casting-on eyelet. Be sure the cam-box is on the left-hand side.

Put the wool under
the sinker hook
before the first
needle.

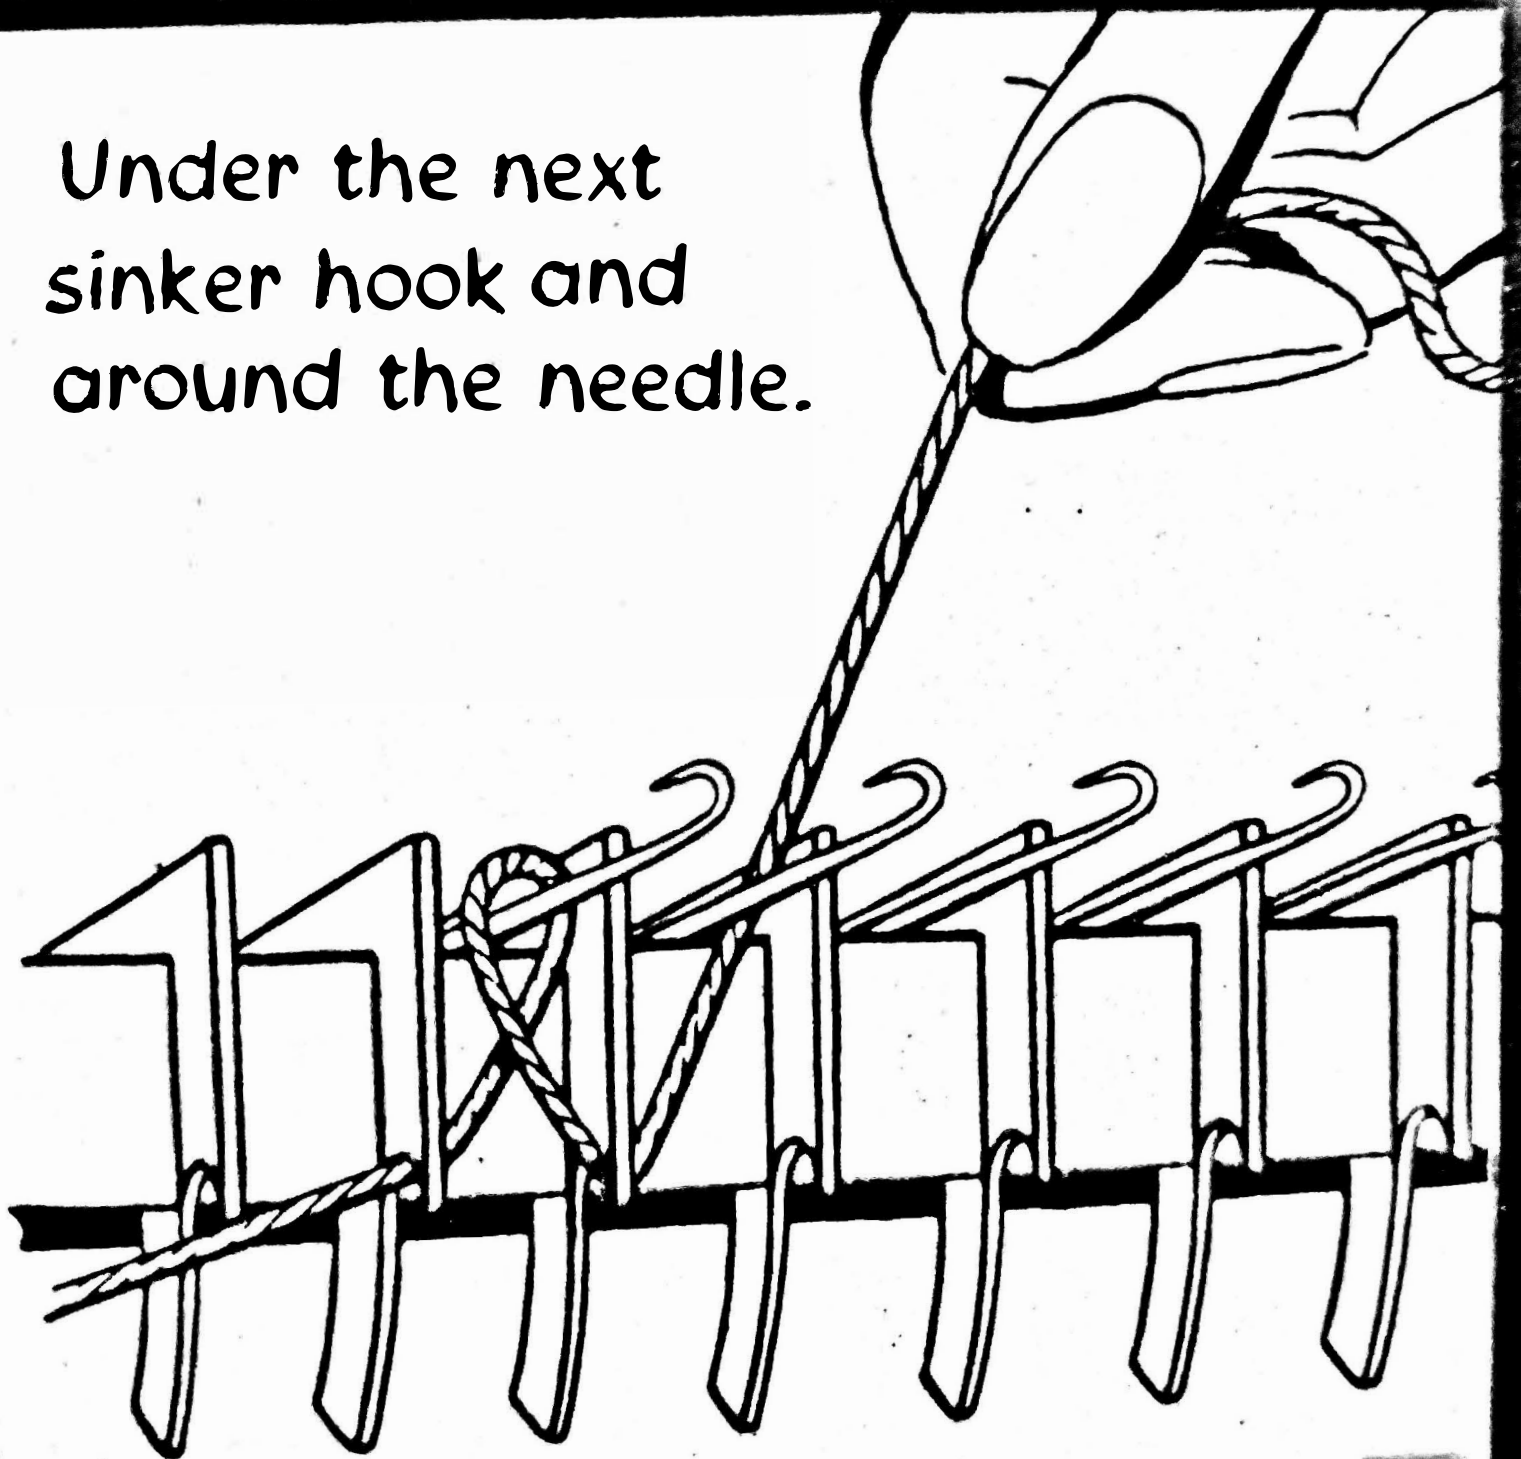

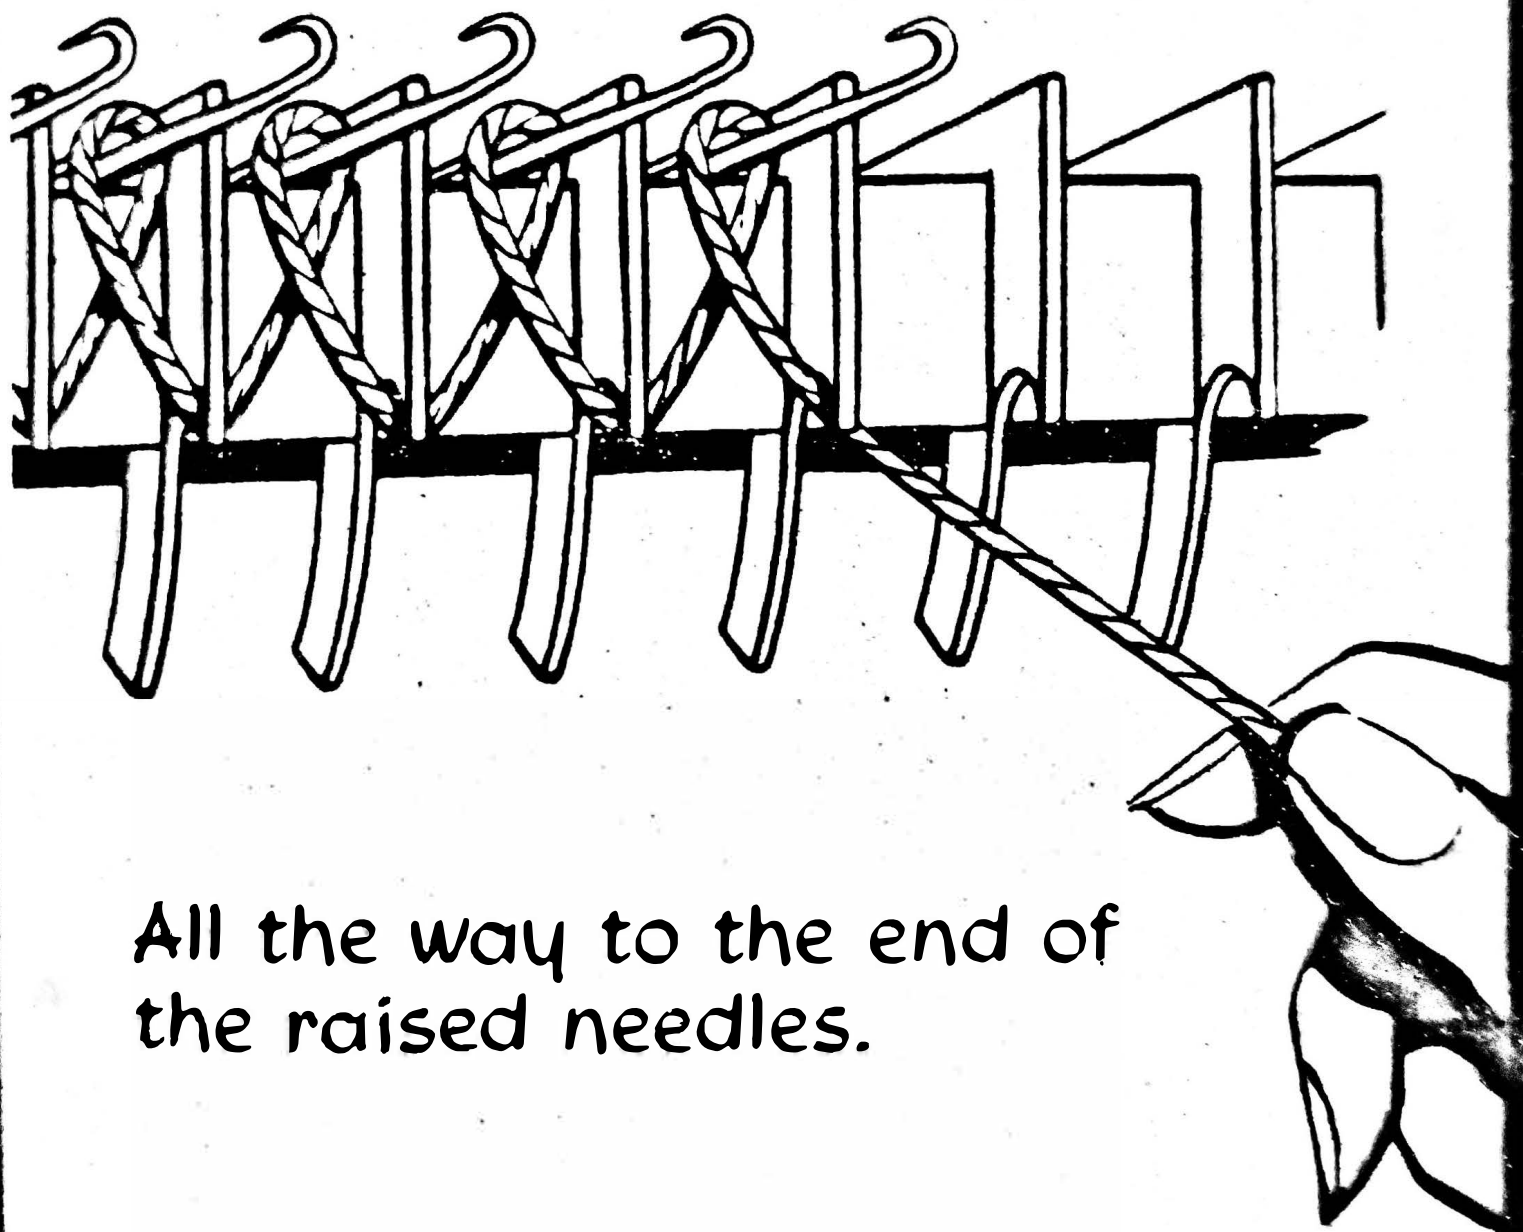

Wind the wool,
anti-clockwise,

up-over the needle-
and down.

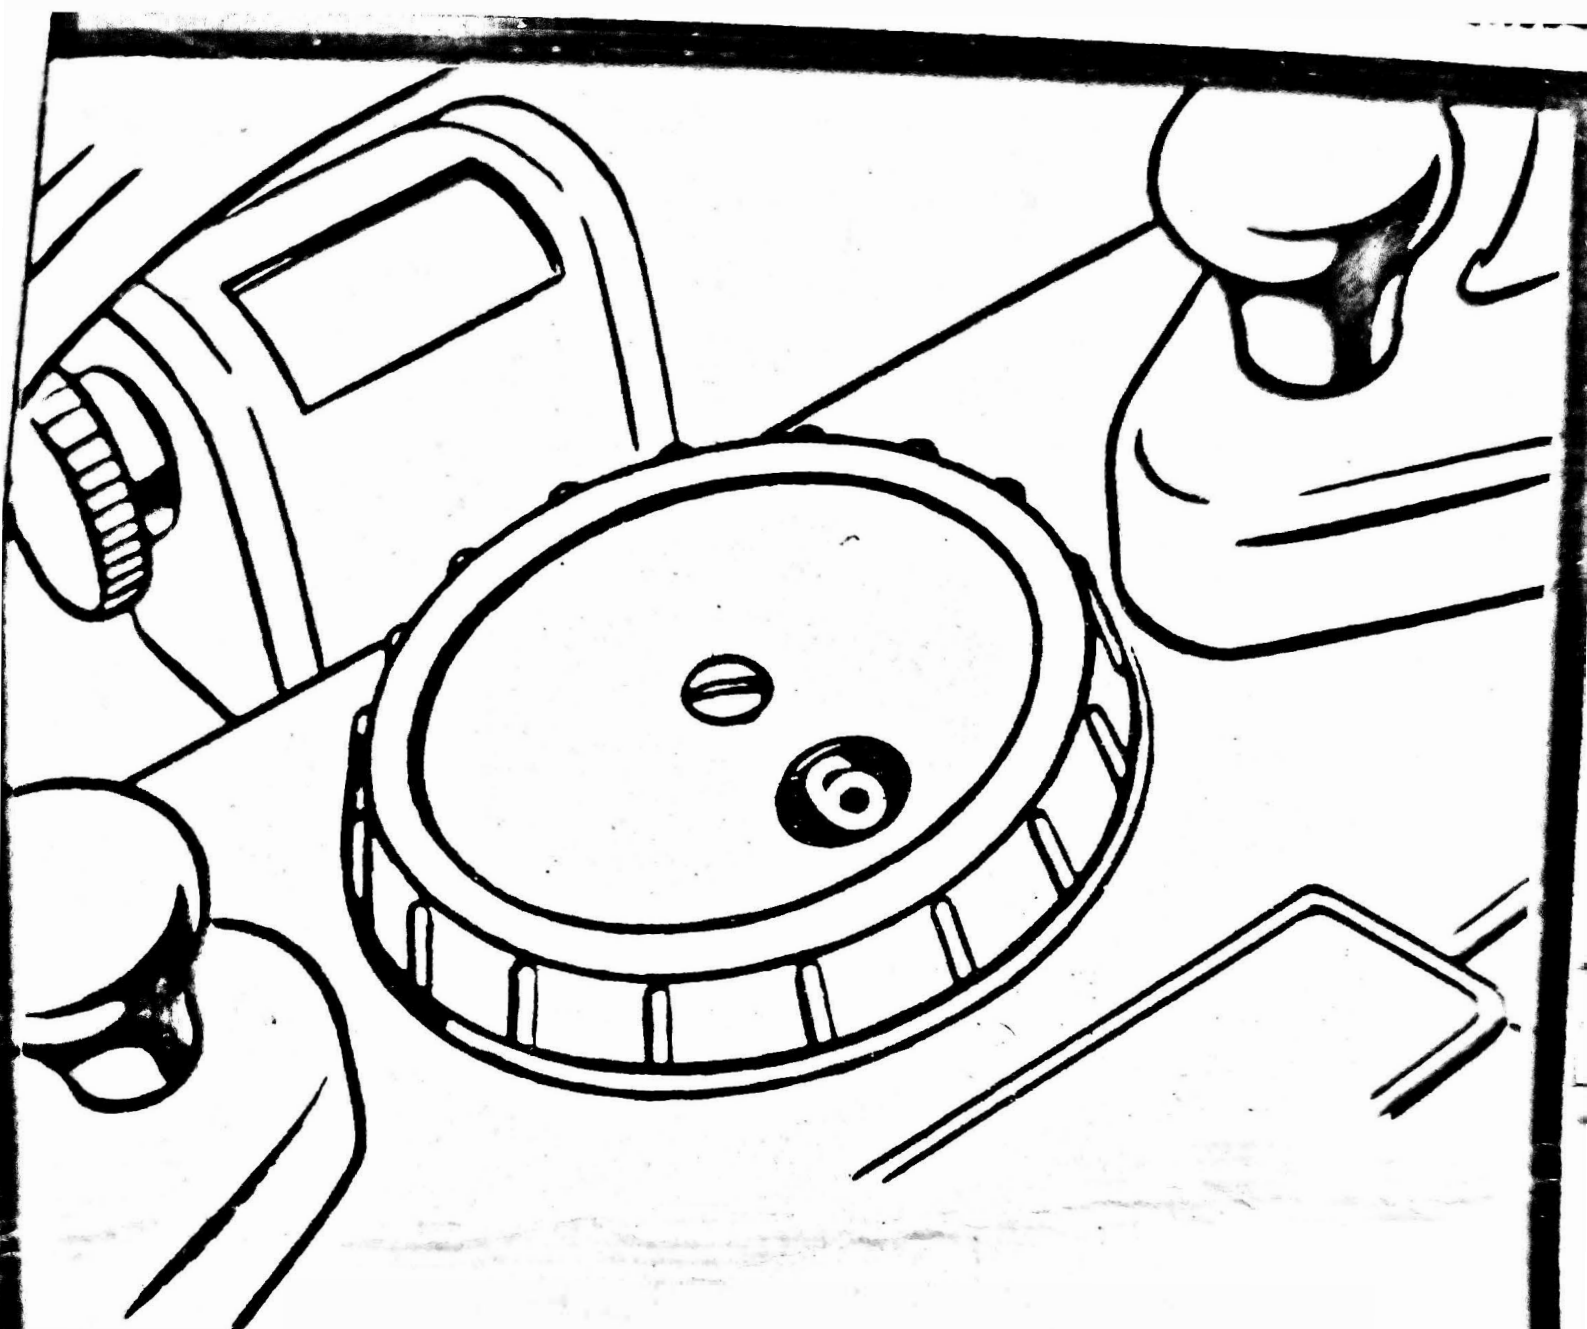

Under the next
sinker hook and
around the needle.

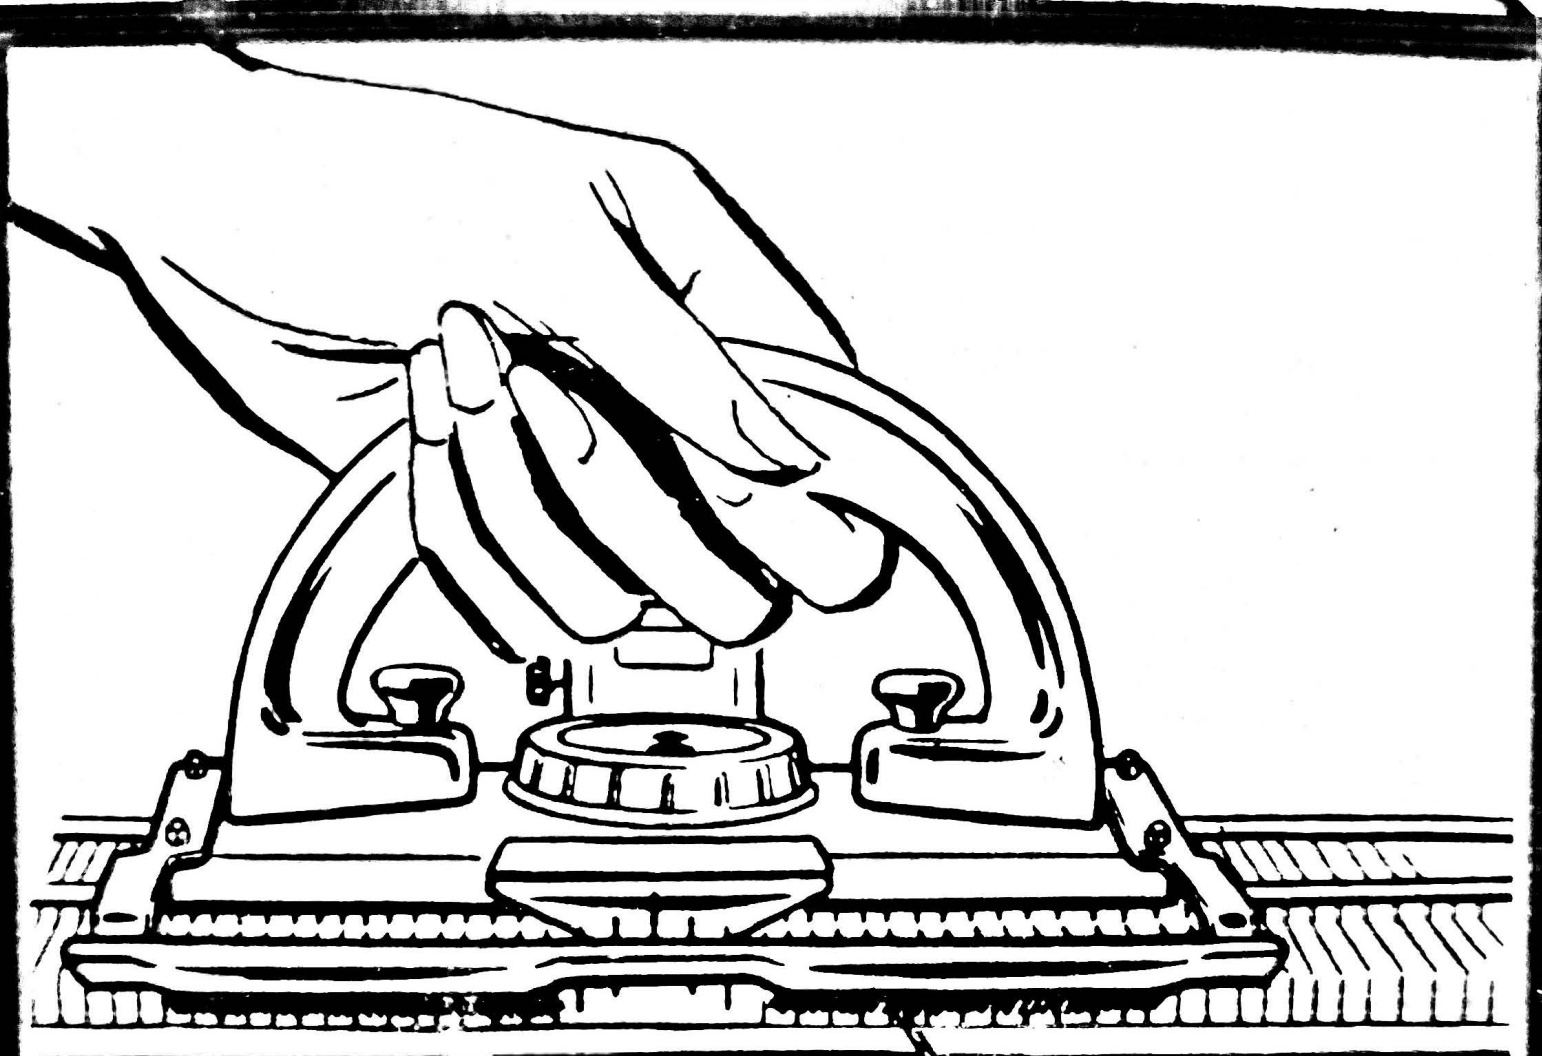

All the way to the end of
the raised needles.

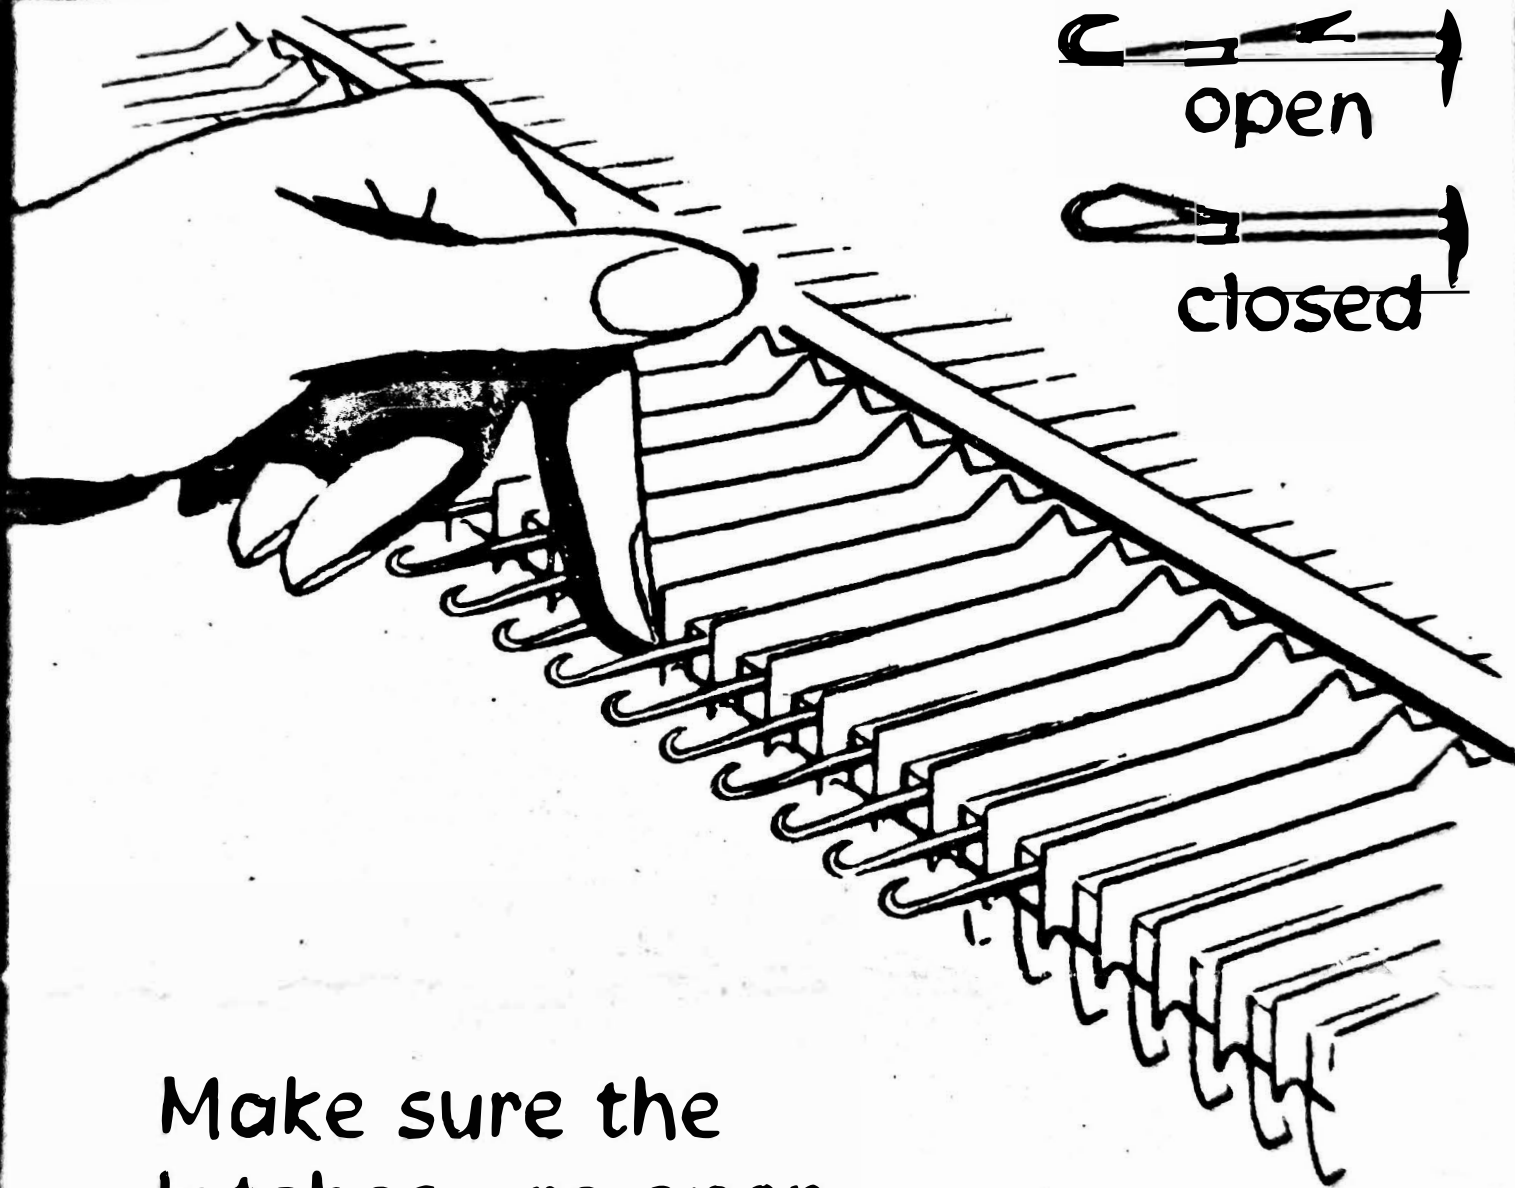

Set the tension to
required setting (try No. 6).

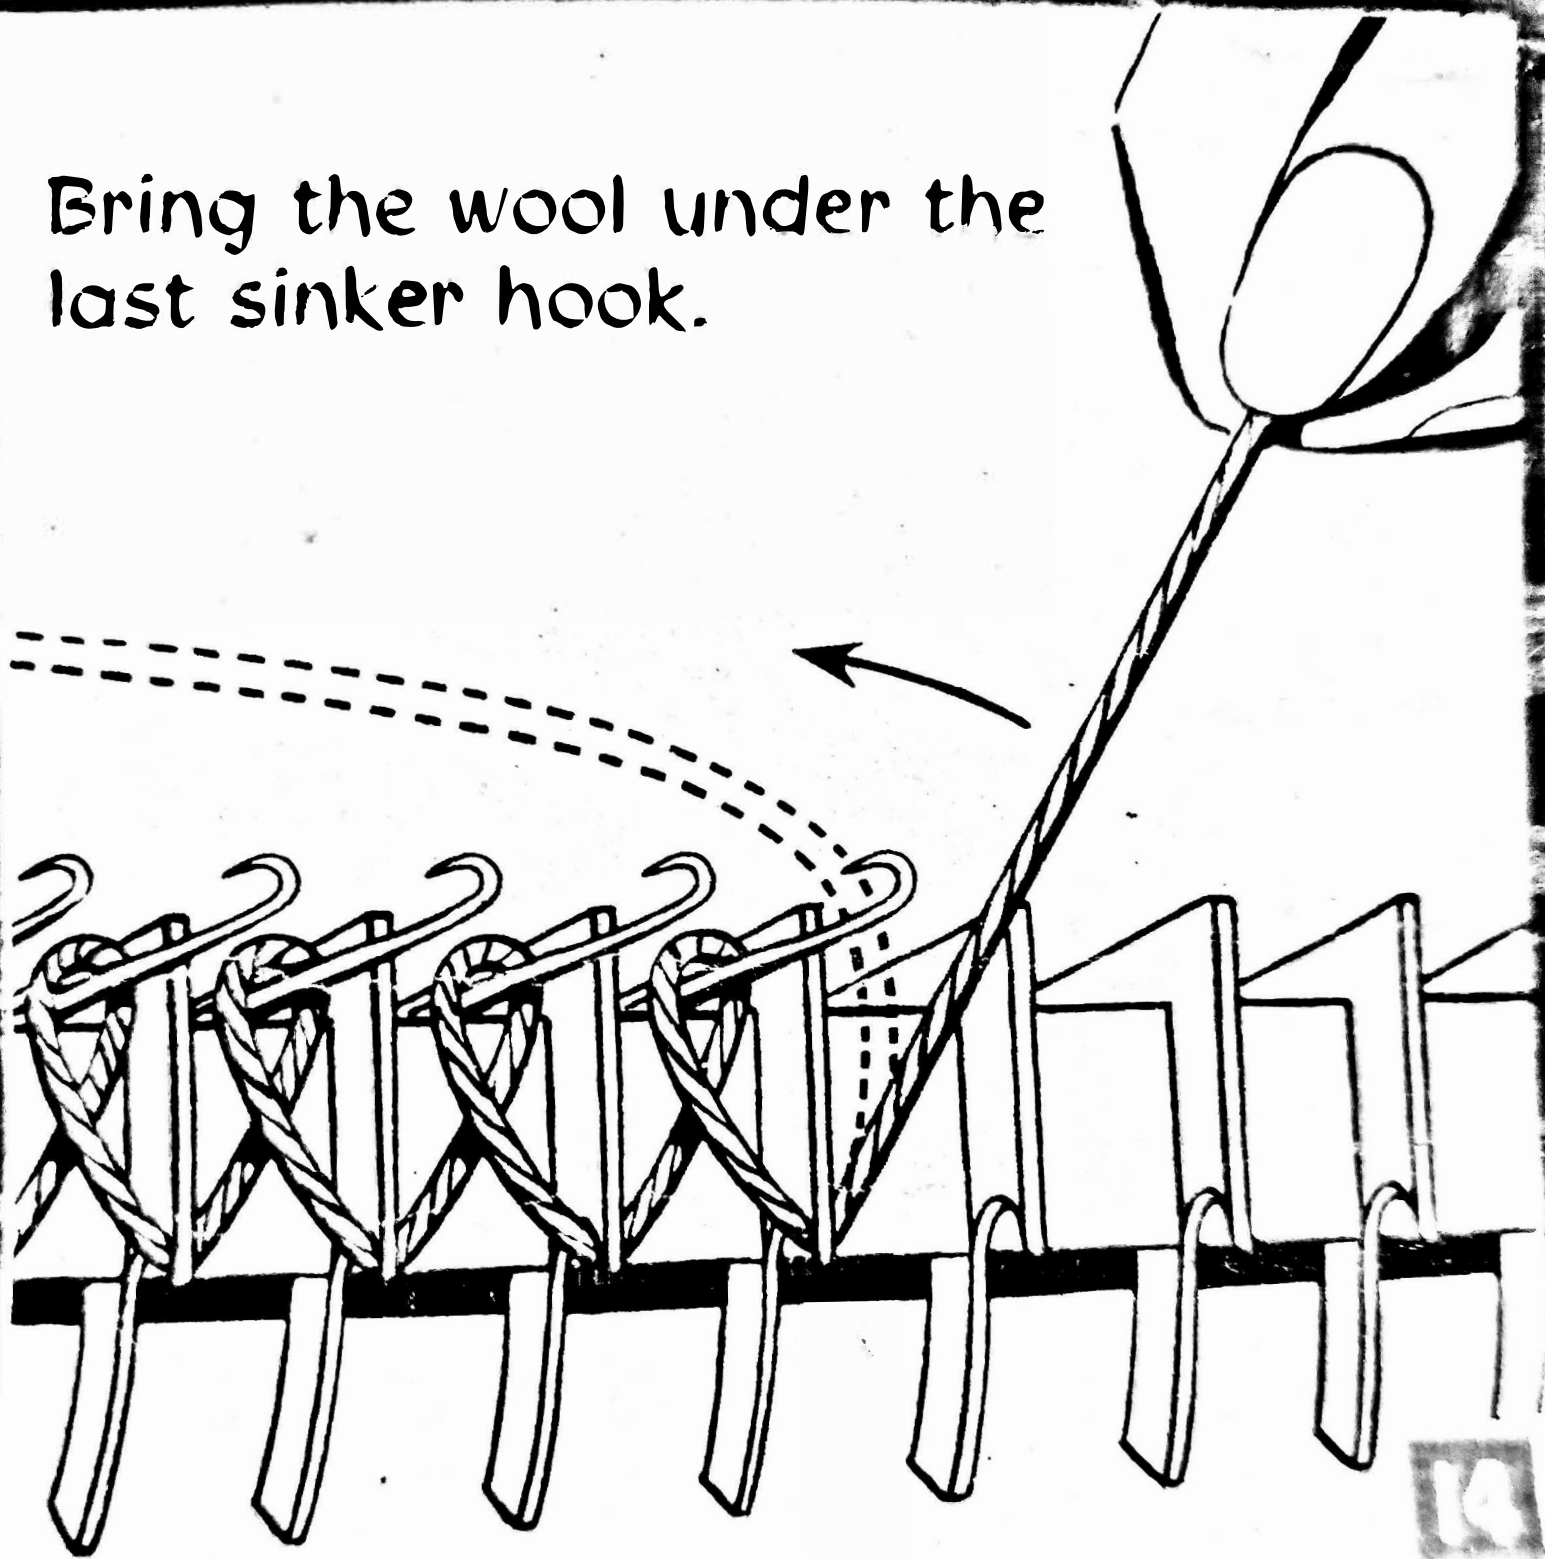

Bring the cam-box
across from the left
to the right. Do not
put the wool across
the needles.

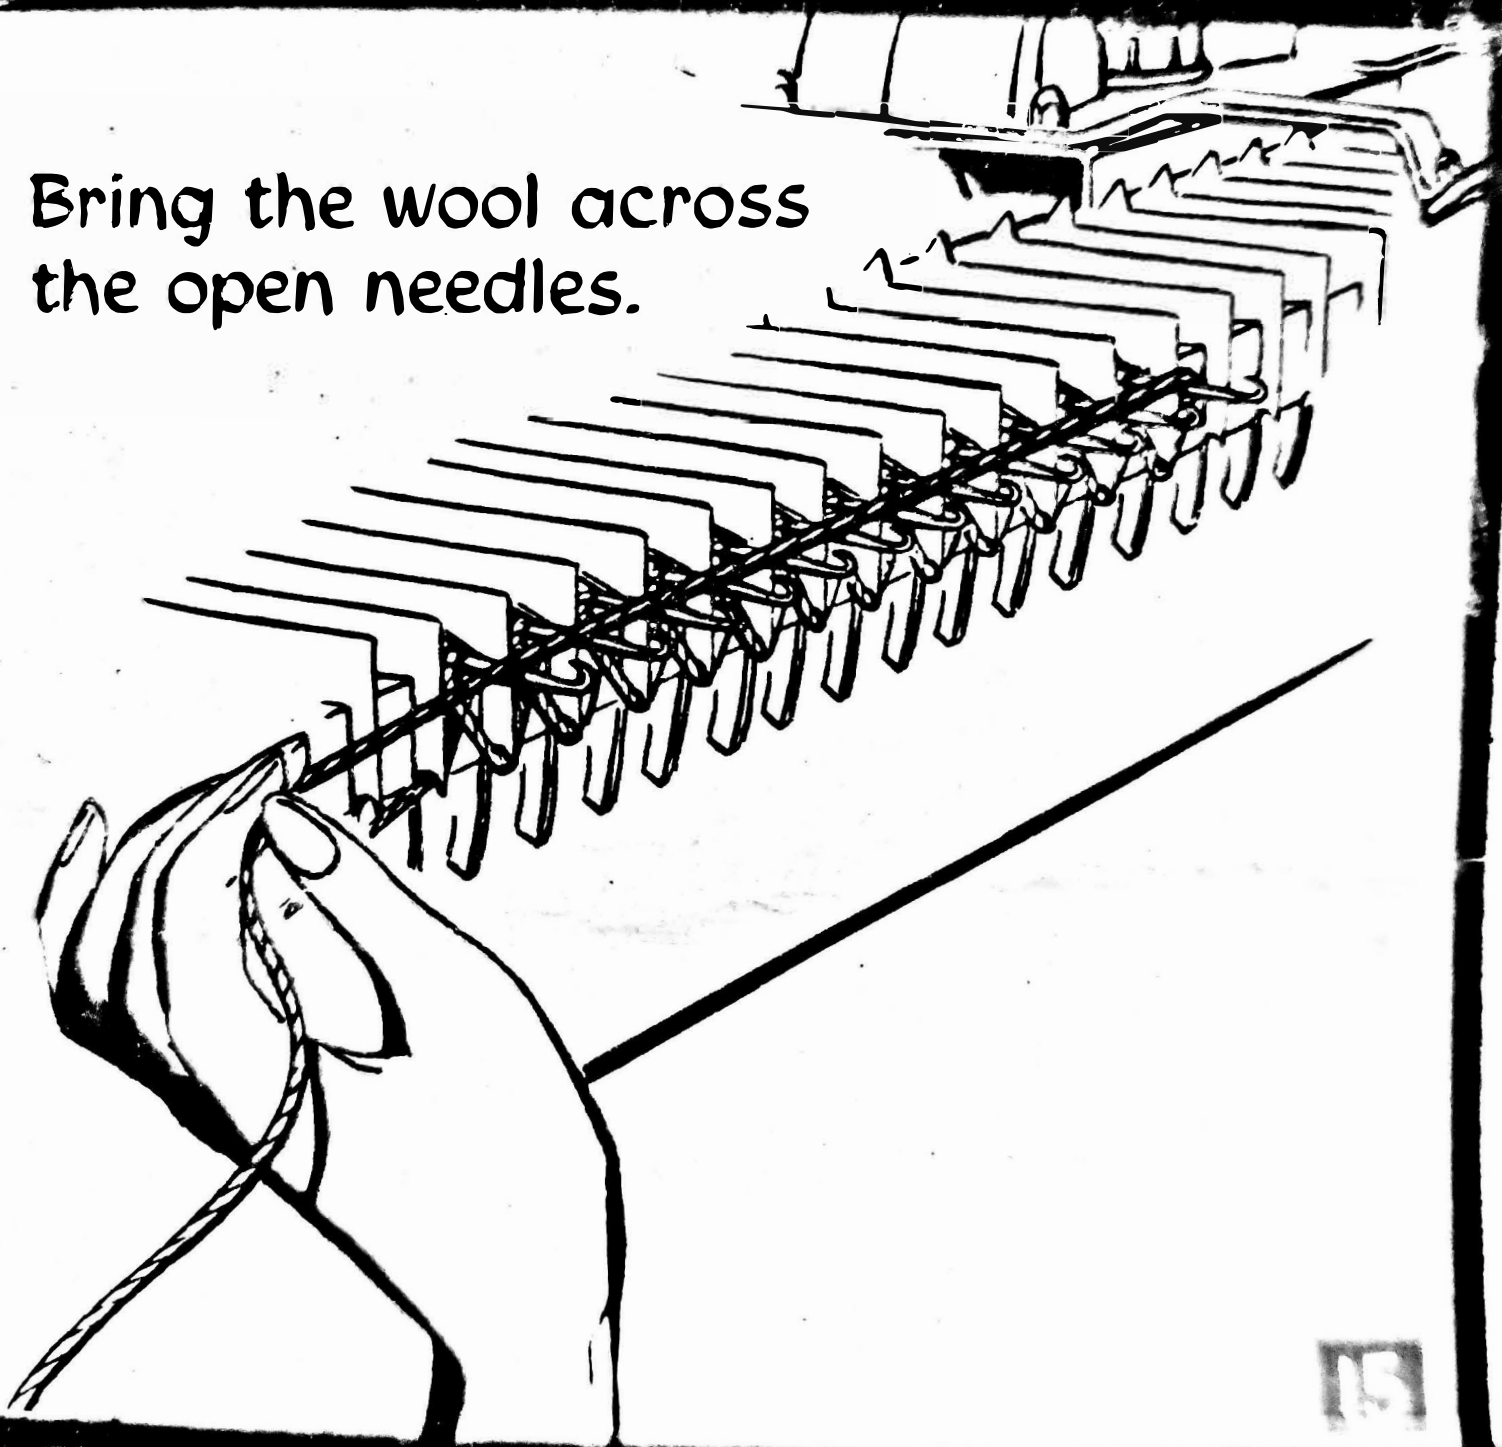

Make sure the
latches are open.

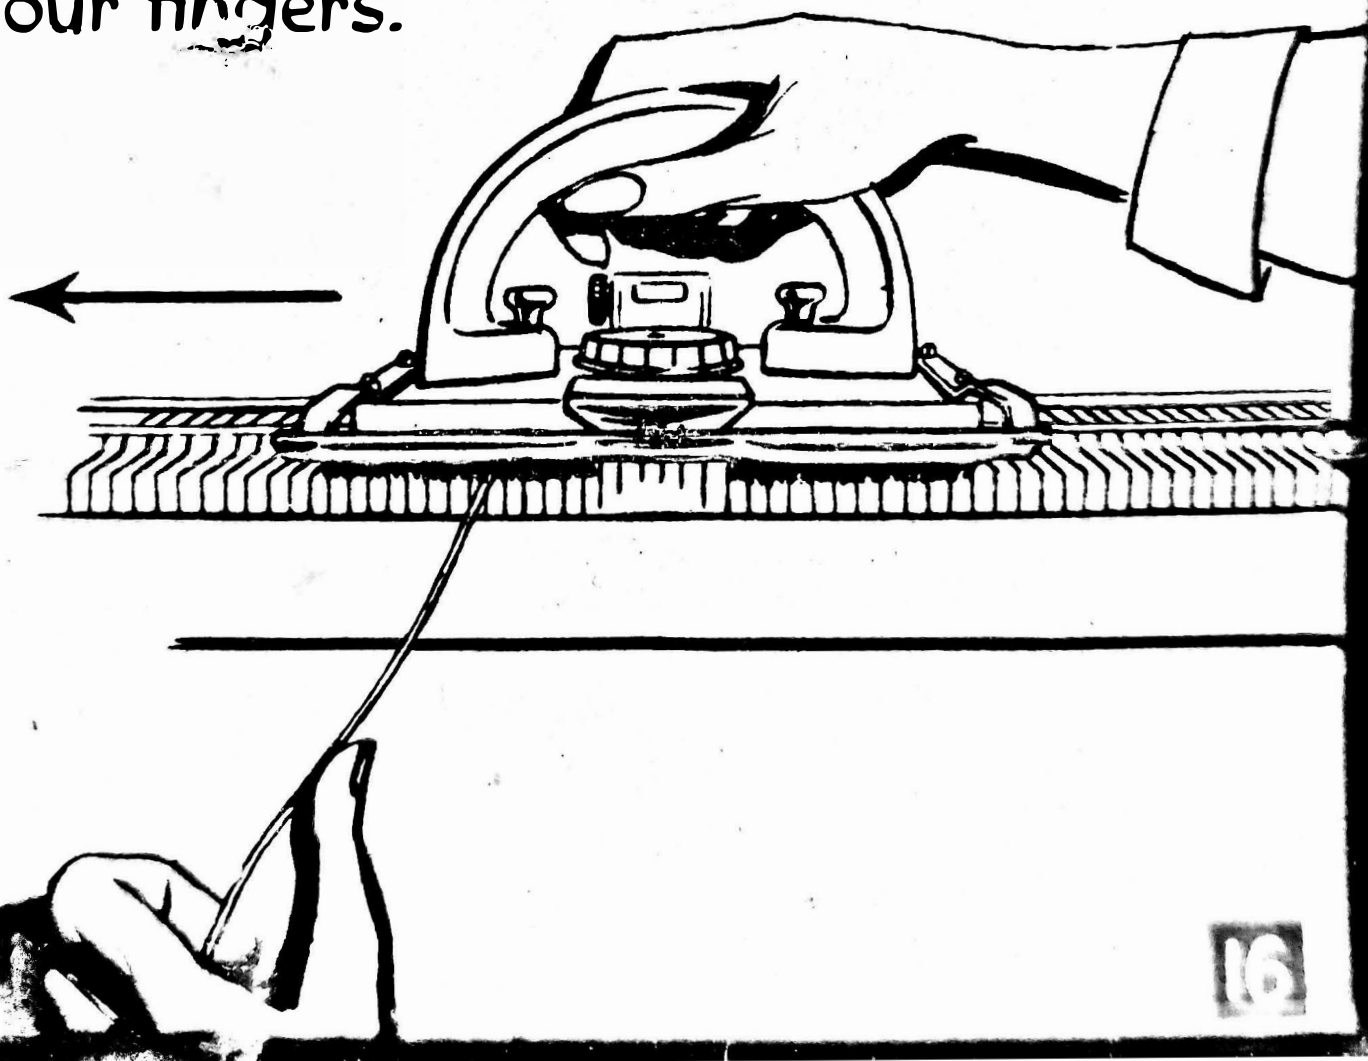

Bring the wool under the last sinker hook.

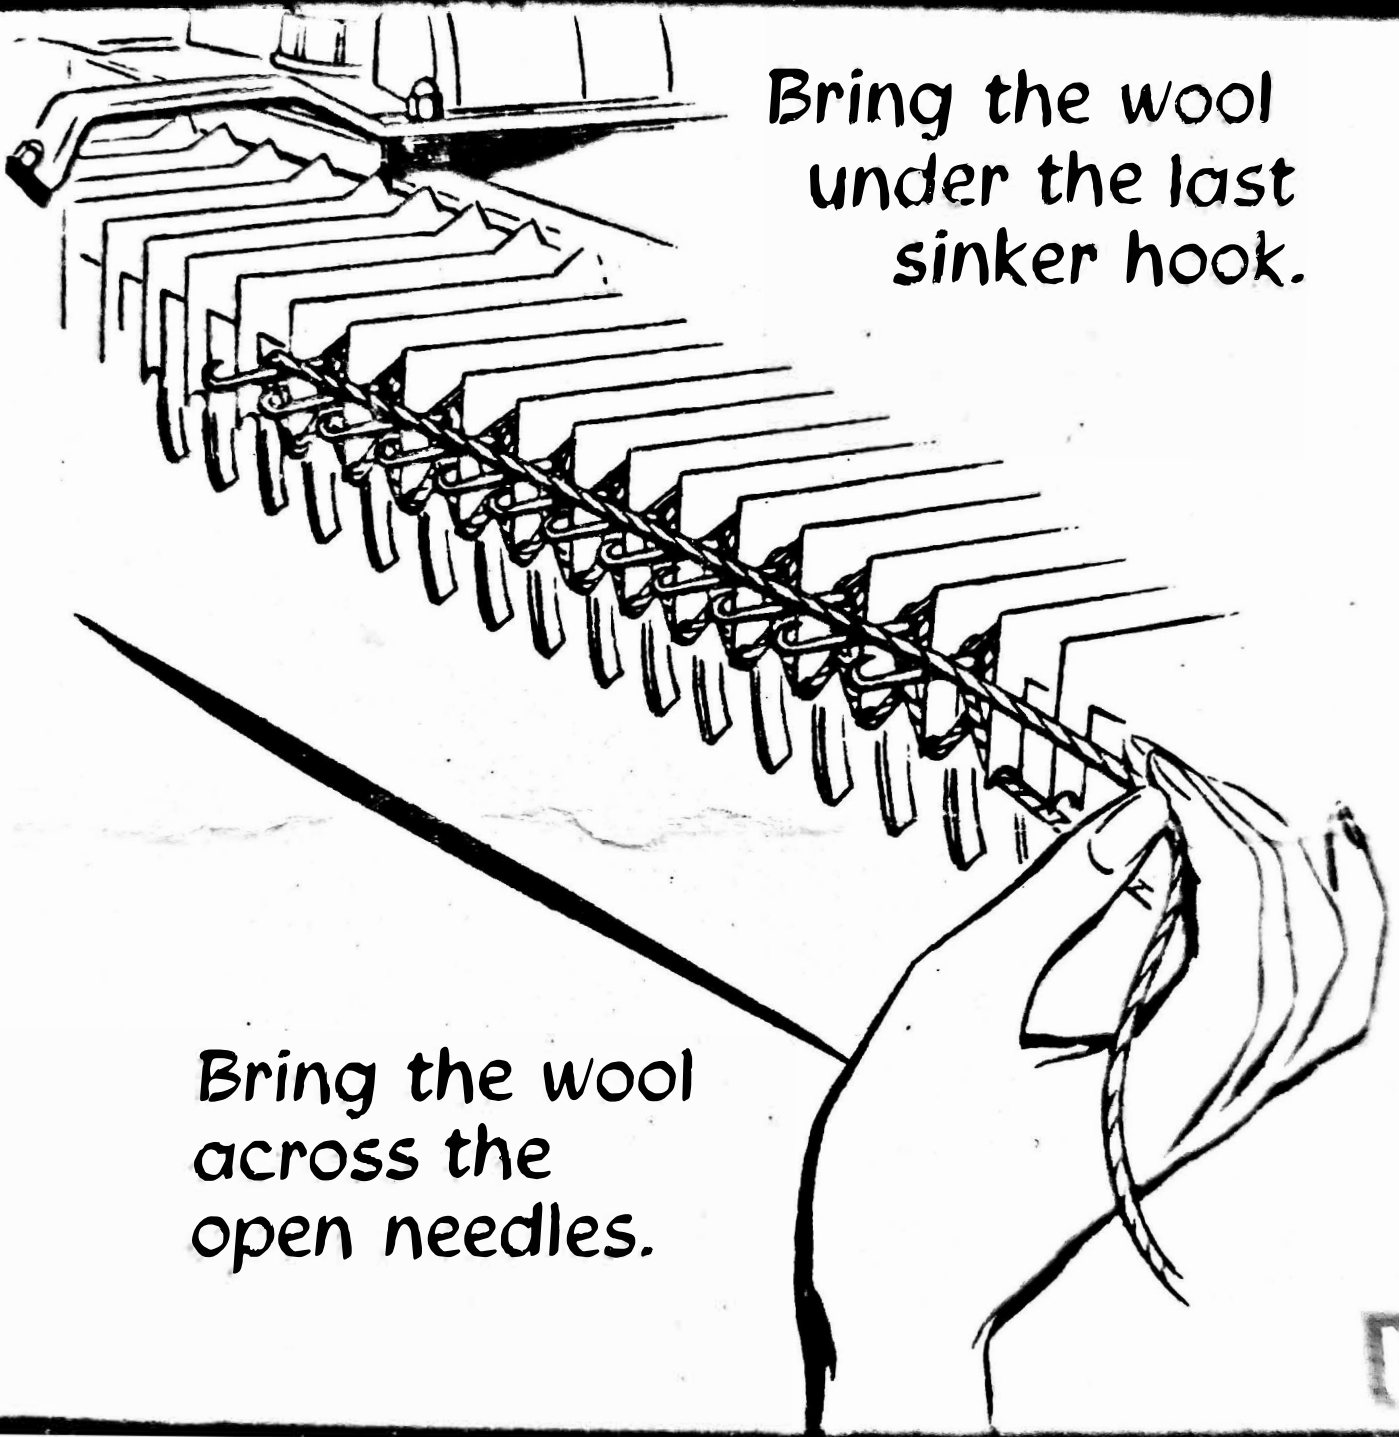

Bring the wool across
the open needles.

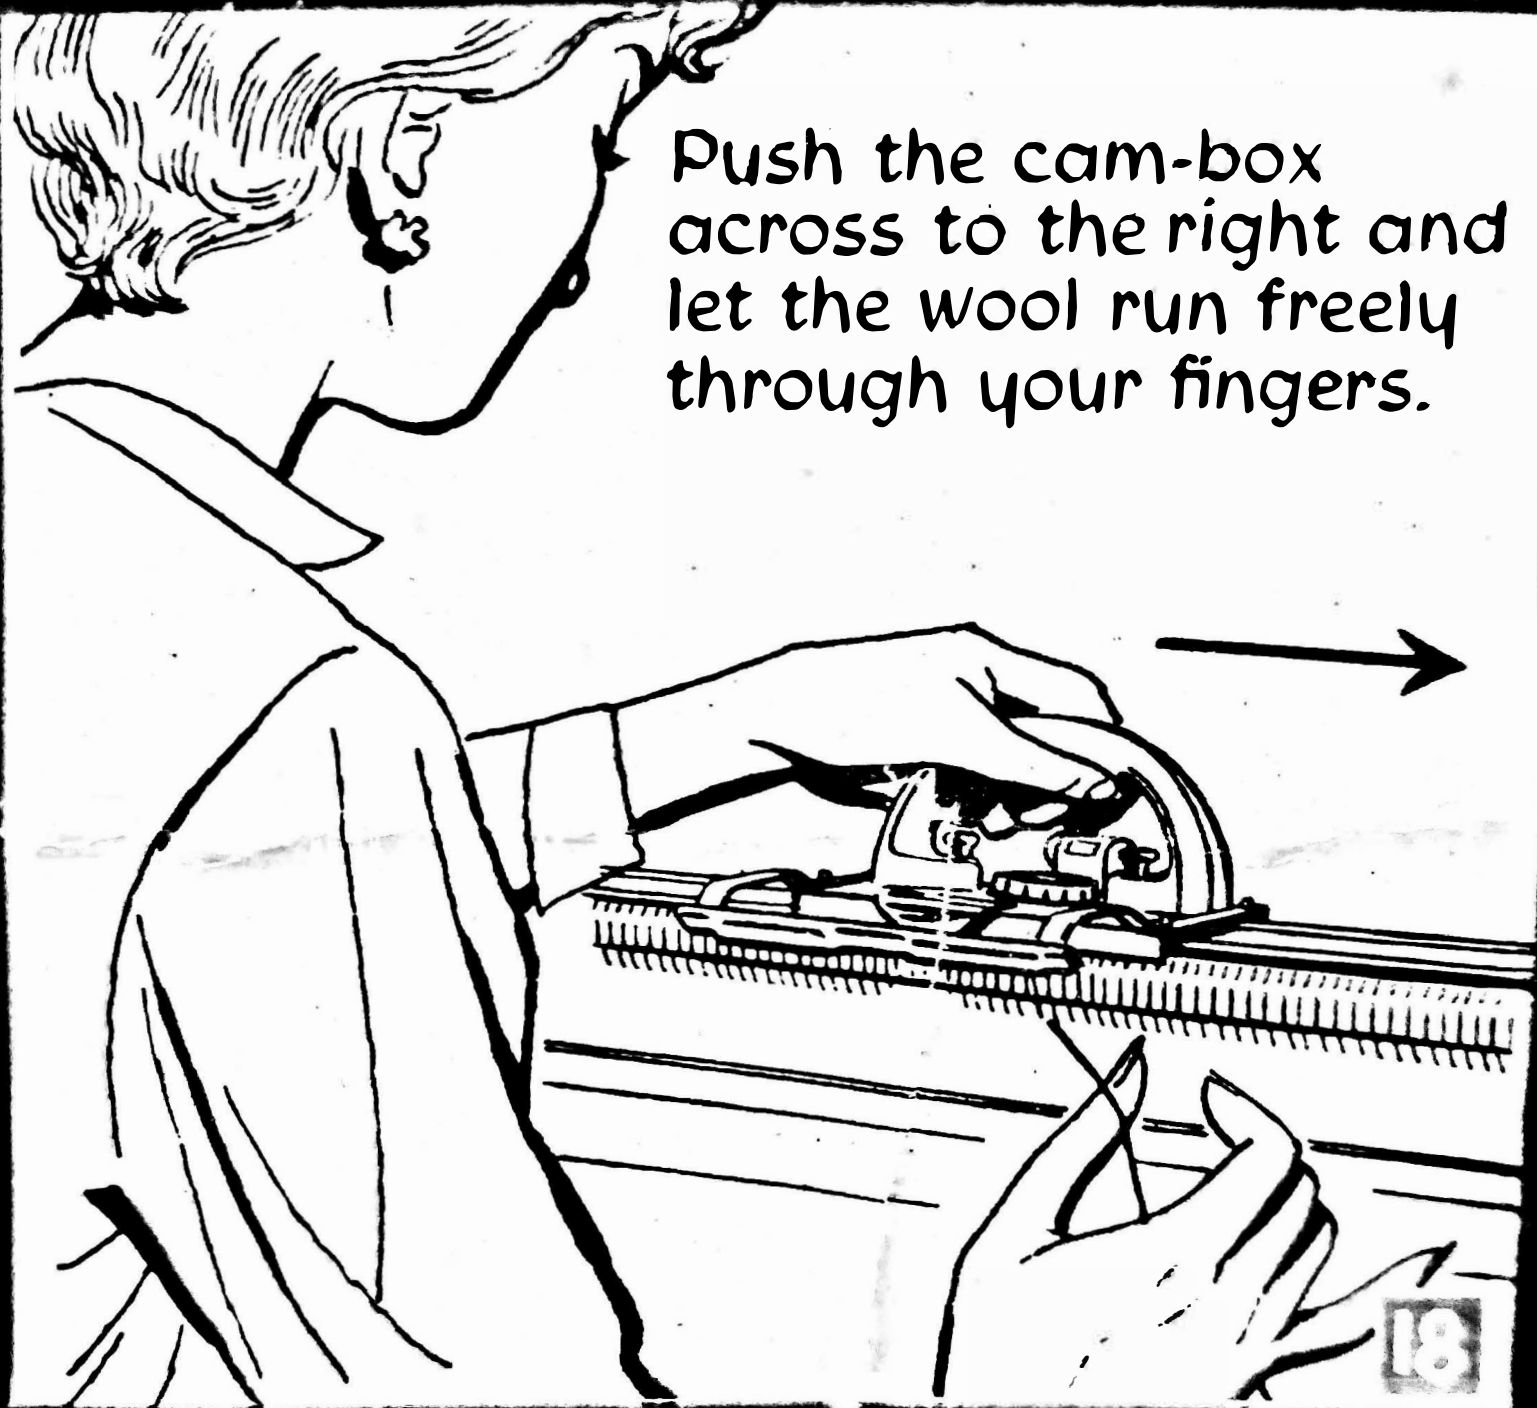

Bring the cam-box across to the left
—press down slightly. Hold the wool
down and let it run freely through
your fingers.

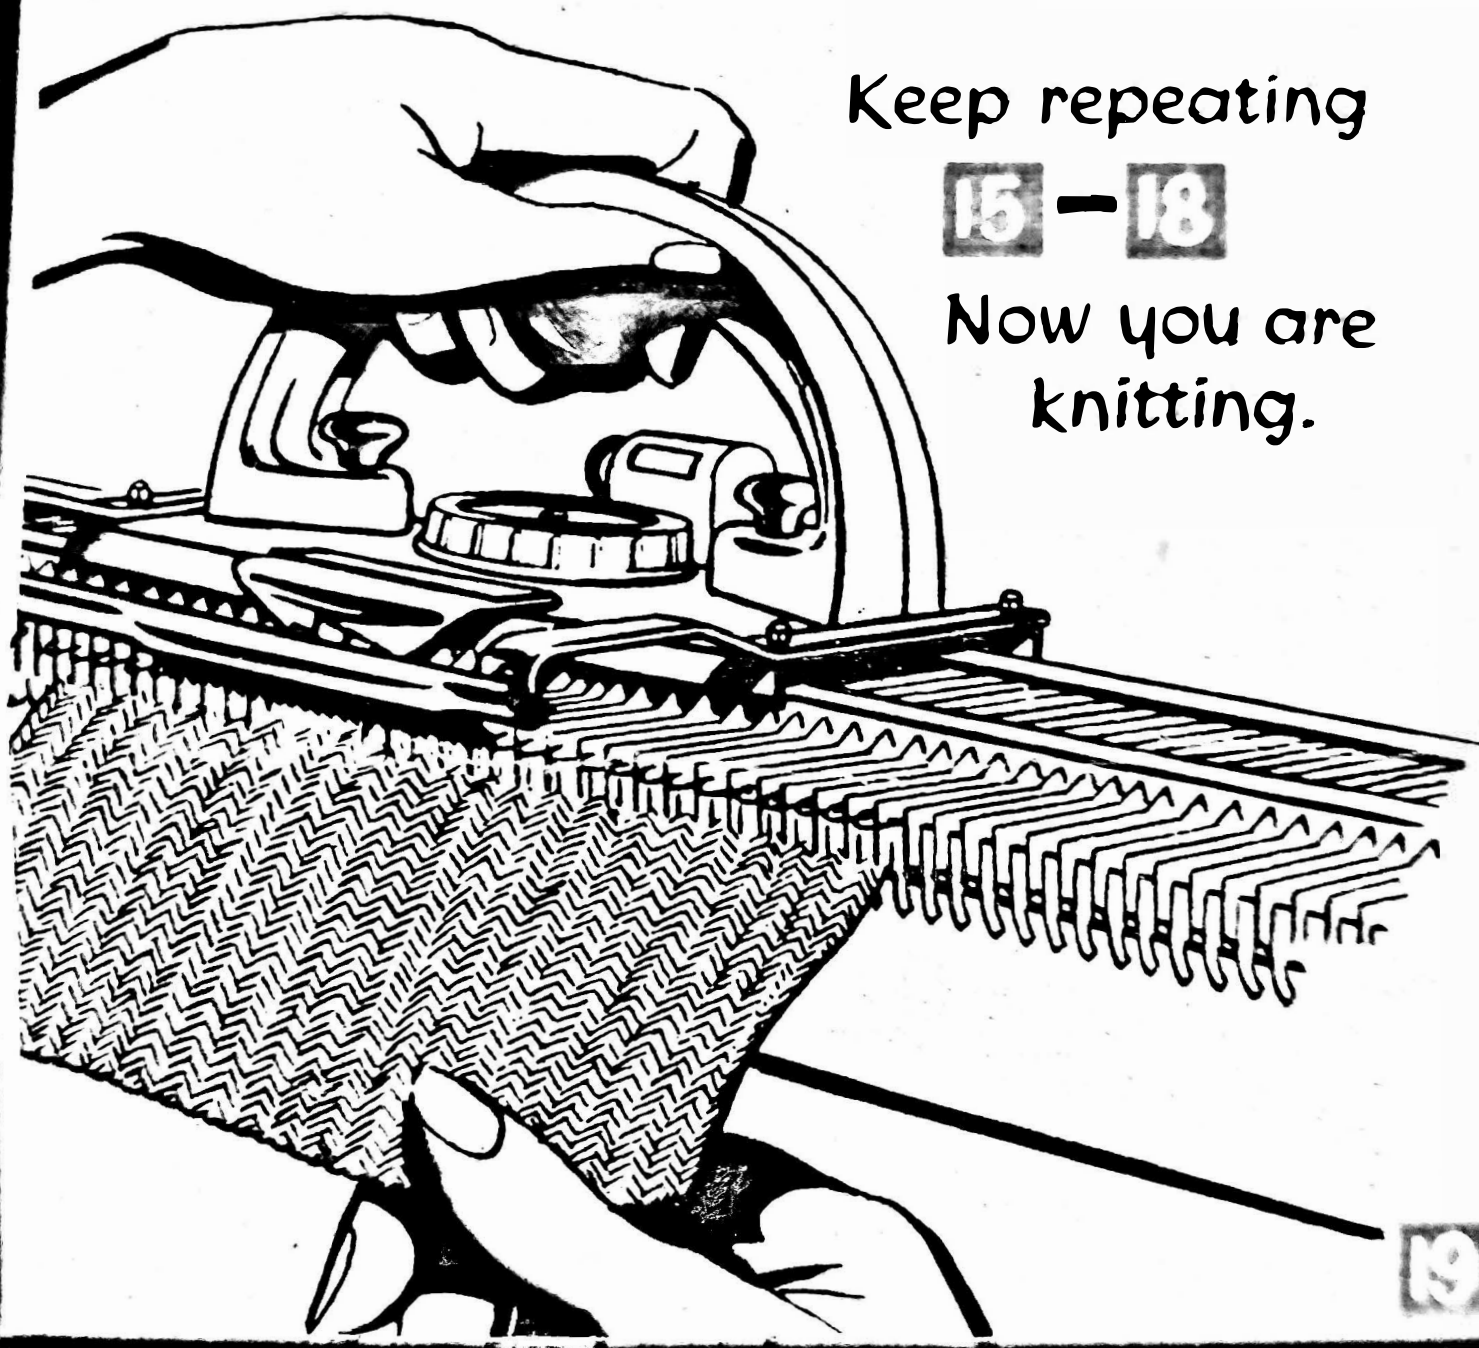

Bring the wool
under the last
sinker hook.

Bring the wool
across the
open needles.

Push the cam-box
across to the right and
let the wool run freely
through your fingers.

Keep repeating

15 - **18**

Now you are
knitting.

Soon you will be
knitting really
beautiful garments.
